Advanced Master in **Privacy, Cybersecurity** and **Data Management**

This advanced master's programme offers tomorrow's leaders a future-proof methodology to perform in the challenging global field of privacy, cybersecurity and data management. **The two-year part-time programme offers an ambitious curriculum that bridges the intersection between law, technology, ethics, governance and management.** You will gain deep knowledge of the legal and technological aspects of EU and global data protection and cybersecurity issues, a sound ethical and business understanding of data usage practices, combined with a broader skillset comprising management and leadership skills, communication skills and related soft skills.

Upon successfully completing the programme, you will be a key driver in enhancing trust in a global digital economy and society by applying a competent and ethical approach to the processing of personal data.

Paolo Balboni
Professor of Privacy, Cybersecurity, and IT Contract Law at ECPC

"Our data-driven economy and society needs competent and responsible managers. You can become one of them!"

Why this programme?

This programme feeds into an increasing demand of the global market by offering education to the most influential professionals: the current and future managers within businesses and public organisations. These are the persons responsible not only for the management of technical and organisational measures, but also for relations of their organisation with public and private bodies, individuals and public at large. The impact of decisions made by such 'data leaders' may be substantial worldwide.

Courses & curriculum 2024 - 2026

In line with Maastricht University's experience in creating a **learning environment that bridges academic excellence with practical relevance**, the programme's knowledge and skills are taught in a way that enables you to develop a methodology to keep up to date with current developments in a fast-paced field. This is achieved by utilizing **problem-based learning** approach, for which Maastricht University is renowned and by injecting practical knowledge via teaching staff and guest lecturers who work at the top of their domain.
